

# DOMAINE DE COURBISSAC

## Les Traverses Rosé

### ORIGIN

*France*

### APPELLATION

*Minervois*

### SOIL

*Clay-limestone, gravel*

### AGE OF VINES

*20-40*

### ELEVATION

*250 meters*

### VARIETIES

*Grenache, Mourvèdre, Syrah*

### FARMING

*Certified organic (ECOCERT) with biodynamic practices*

### FERMENTATION

*Hand harvested, direct whole cluster pressing, natural yeast fermentation in a concrete tank*

### AGING

*A few months in a 30hl concrete tank*

Reinhard Brundig, a successful film producer from Germany, founded Domaine de Courbissac in 2002. What drew them to this property located in the La Livinière sub-zone of Minervois was three fold: established and well tended vines, the complexity of the soils, and the proximity to La Montagne Noire. At the heart of Domaine de Courbissac are 90 year old Grenache and 70 year-old Carignan as well as some solidly middle-aged Syrah and Mourvedre of about 40 years-old. Farmed biodynamically since 2002, Reinhard has expanded the size of the vineyards, now totaling 30 hectares, by planting some additional Syrah, Grenache and Mourvedre. At the end of 2013, Reinhard brought in Brunnhilde Claux, a young vigneronne with an impressive resumé. Brunnhilde got her start at Domaine Gauby where she learned how to handle the natural exuberance of grapes grown in the generous Mediterranean climate. From there she moved on to Terroir al Limit in the Priorat where she worked with Dominik Huber for three vintages before Reinhard tapped her to lead Domaine de Courbissac.

At 250–350 meters above sea level, Domaine de Courbissac benefits from its location near La Montagne Noire, the southern edge of the Massif Central and the terminus of the Cévennes. At the far western border of the Languedoc, Minervois has a semi-continental climate, especially as you approach the northern boundary of the appellation. While the growing season is warm and dry – as the wide, rocky and parched local river beds can attest – winter brings plenty of precipitation to recharge the soils and sustain the vines through the growing season. Daytime temperature in summer are moderated by the influence of the mountains allowing the grapes to reach ripeness in sync with their physiological maturity.

A blend of Grenache with about 10% Mourvèdre, Les Traverses Rosé comes from younger vines between 20-40 years old planted on gravelly clay-limestone soils at an elevation of 250 meters above sea level. Hand-harvested, the whole clusters are pressed gently and slowly to extract the pale color, followed by an indigenous fermentation in concrete. After only a few months of aging in a 30hl concrete tank, the wine is released early the following year.
